

**SONORAN
UNIVERSITY**
OF HEALTH SCIENCES

COLLEGE OF NATUROPATHIC MEDICINE

2024–2025

WHERE NATURE MEETS NURTURE.

At Sonoran University of Health Sciences, we seek people—like you—who love science and marvel at the healing power of nature, and who recognize there is more to health than many realize. We give you the supportive environment you need to thrive during the most challenging and exhilarating years of your life. Our education will change your life, and the career will make the world a better place.^[1]

Do you have the mind of a doctor and the heart of a healer? Find your future in naturopathic medicine at Sonoran University.

Sonoran University prepares its students to make a difference in the rapidly changing field of healthcare.^[2] From our integrated curriculum and wide scope of practice to our state-of-the-art medical center and a strong sense of community, Sonoran University's rich learning environment focuses on innovation and cutting-edge research while honoring the principles of naturopathic medicine.^[3] Sonoran University is a place where passionate, like-minded students, faculty, and staff come together to make a difference in people's lives.

We believe in applying the evidence-based approach of science to time-tested natural healing therapies.^[4] Our graduates go on to successful careers—including establishing flourishing practices, either on their own or alongside conventional medical practitioners, while simultaneously helping shape the way our world views healthcare.^[5]

WHY SONORAN UNIVERSITY?

BE A FORCE OF NATURE.

Sonoran University of Health Sciences is dedicated to a team-based and patient-centered approach to healthcare. Blending patient care with innovative research and a leading naturopathic curriculum, Sonoran University students and graduates are using a uniquely different mindset to change healthcare.^[6]

Founded in 1992, Sonoran University has a long history of providing education and care for those looking for integrative healthcare.^[7] From our inception, we've blended new ways of learning and teaching with timeless principles of naturopathic and conventional medicine.

For 28 years, Sonoran University was a single degree college. Now, we are a full-fledged university with multiple degree offerings.^[8] We remain committed to our founders' vision of making Sonoran University of Health Sciences a force for change to help transform healthcare. Sonoran is much more than a bricks-and-mortar academic institution. It's a place where passionate, like-minded students, faculty and staff come together to make a difference in people's lives.

Sonoran University of Health Sciences is a social profit (not for profit) institution licensed by the Arizona Board for Private Post Secondary Education, regionally accredited by the Higher Learning Commission, programmatically accredited by the Council on Naturopathic Medical Education, and approved by the State Authorization Reciprocity Agreement. For more information on accreditation, please refer to sonoran.edu/about-sonoran/accreditation.

MISSION

SHAPING A HEALTHIER FUTURE.

Sonoran University of Health Sciences shapes a healthier future by supporting students as they train to excel as healthcare professionals, by enhancing the health and wellbeing of our patients and communities, and by discovering effective treatments for humanity grounded in the healing power of nature.

VISION

A world that embraces the healing power of nature.

WE LIVE OUR VALUES.

We Shape the Future

We Love

We Achieve Excellence

We Are Resilient

We Do the Right Thing

HERE'S WHAT MAKES SONORAN UNIVERSITY GREAT.

▲ LOCATION

Naturopathic medicine in Arizona has the widest scope of practice in North America, providing Sonoran University students the broadest training in all facets of naturopathic medicine.^[10]

▲ COMMUNITY

Enjoy a collaborative, intimate campus with the amenities of a modern campus including access to a fitness center, healthy café, yoga studio, teaching kitchen, and two on-site medical clinics.^[9]

▲ RESEARCH

Students participate in research bridging the gap between naturopathic and conventional medicine. The Ric Scalzo Institute for Botanical Research explores the molecular biology of medicinal plants, including how botanicals act on a cellular level, in Biosafety Level II, analytical chemistry, and isolation laboratories. **To learn more, visit sonoran.edu/research**

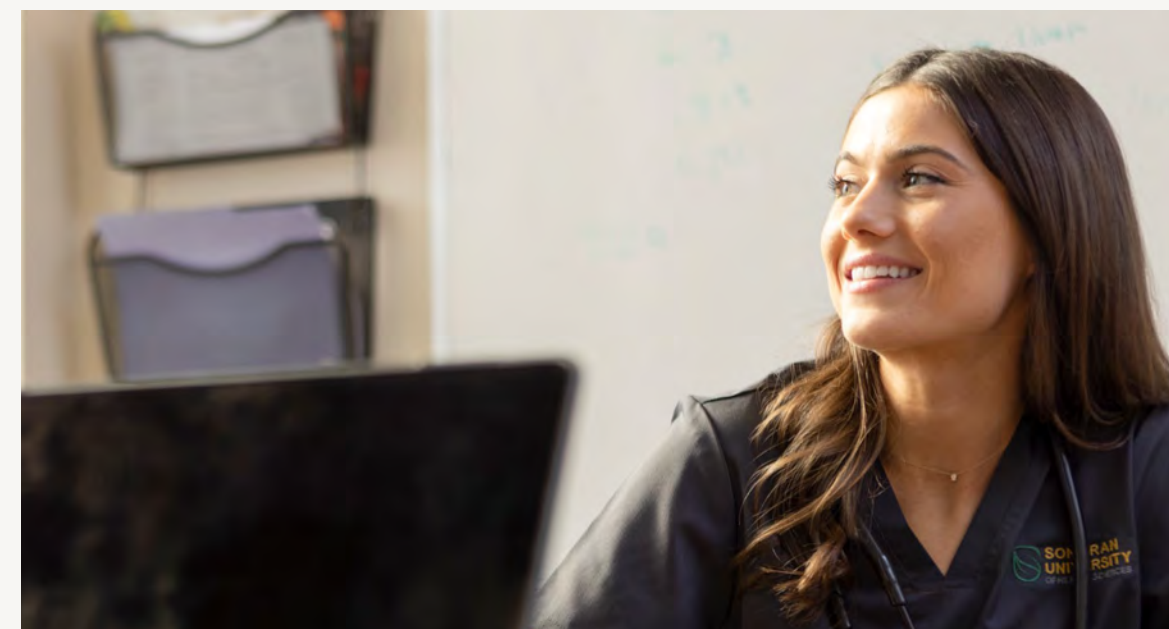

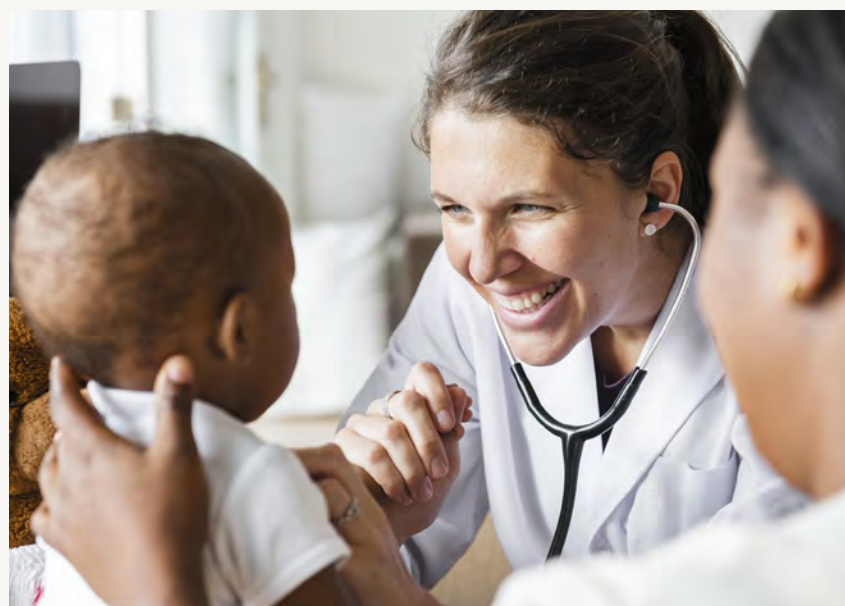

▲ OUTREACH

Sonoran University provides free care in underserved communities and support for organizations like Naturopaths Without Borders connects students to a diverse range of patients and health conditions.^[11]

► CAREER SUCCESS

Sonoran University has a comprehensive suite of career services available to naturopathic medical students, ensuring students have access to career opportunities upon and beyond graduation.^[12]

▲ ACADEMIC & CLINICAL EXPERIENCES

Passion for teaching and a profound belief in naturopathic medicine binds Sonoran University faculty. This creates a strong didactic and clinical education experience.^[13]

EXPERIENCE A STATE-OF-THE- ART CAMPUS.

Situated on 8 acres, our multi-building campus is in Tempe, Arizona. It centers around a 48,000-square-foot, LEED-platinum building, the Mr. Andrew C.G. & Dr. Ruth Tan Lim Commons, and features an on-site medical center, the integrative Neil Riordan Center for Regenerative Medicine, Ric Scalzo Institute for Botanical Research, and state-of-the-art classrooms, labs and more.

A virtual tour is available online at:
sonoran.edu/admissions/visit-sonoran

An aerial photograph of a suburban neighborhood at dusk. The houses are illuminated by warm interior and exterior lights, contrasting with the cool tones of the twilight sky. In the background, a large, rugged mountain rises, its peaks also catching the low light of the setting or rising sun. The overall mood is peaceful yet vibrant.

ARE WE SURROUNDED BY A BUSTLING CITY OR A SERENE LANDSCAPE? YES.

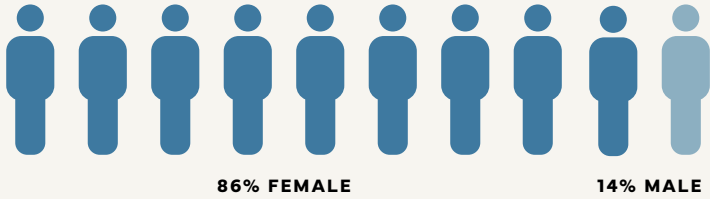

At Sonoran University, we're lucky to call Arizona home. With more than 300 days of sunshine each year, Arizona is a destination for nature and outdoor enthusiasts. Enjoy hiking, biking, boating, swimming, golfing, horseback riding—and even skiing or snowboarding during the winter. Take a weekend trip to Arizona destinations like Sedona, Tucson, the Grand Canyon, Mogollon Rim and the White Mountains. Phoenix's central location also makes it easy to drive to the bright lights of Las Vegas and the beaches of southern California or Mexico. No matter how you spend your free time, **Arizona is the place to be.**

YOU'LL FIT RIGHT IN.

SONORAN UNIVERSITY COLLEGE OF NATUROPATHIC
MEDICINE OVERVIEW

WHERE TRADITION MEETS INNOVATION.

Sonoran University has the only accredited, full-time, four-year Doctor of Naturopathic Medicine degree program in the southwest.^[14] Our innovative curriculum consists of rigorous academic study and extensive supervised clinical experiences in a variety of settings, including our onsite Sonoran University Medical Center and Sonoran University Neil Riordan Center for Regenerative Medicine.^[15] In addition to exposure to the widest scope of naturopathic therapies, you will also study the basic sciences that form the foundation across medical education.^[16] Clinical milestones are achieved throughout the program and provide the appropriate progression of medical education for graduates to become successful naturopathic physicians.^[17] Plus, this education sets up students for the Naturopathic Physician Licensing Examination (NPLEX) and students in our program consistently score higher than average.^[18] This proves that our graduates are ready to become successful practitioners.

MESSAGE FROM THE DEAN

Hello Future Doctor,

Your journey begins here—in the College of Naturopathic Medicine, where you become part of the change you want to see in medicine and healthcare. Being a naturopathic doctor means treating the whole person with a profound understanding of the patient as an individual. At Sonoran University of Health Sciences, the healing power of nature takes shape through rigorous evidence-based training and research. Naturopathic doctors are at the forefront of preventative medicine by guiding patients to achieve optimal health outcomes. Illustrated in the core principles of naturopathic medicine:

- ▶ Do No Harm
- ▶ The Healing Power of Nature
- ▶ Identify and Treat the Cause
- ▶ Treat the Whole Person
- ▶ Doctor as Teacher
- ▶ Practice Prevention

These principles are the foundation of naturopathic medicine, aiding in discovering and treating chronic diseases, diabetes, and non-opioid pain management. When you become an ND, you join a respected and rewarding profession. Sonoran University is here to inspire, nurture, and support you, a new generation of doctors. We provide the landscape, but the focus is your journey.

Yours in health,

Jessica Mitchell, ND FABNP
Dean, College of Naturopathic Medicine

WHAT IS NATUROPATHIC MEDICINE?

Treating the whole person requires a profound understanding of the patient as an individual. Naturopathic doctors identify the underlying cause of a condition and combine the best of conventional medicine and alternative therapies to help achieve optimal health. By expertly guiding the patient toward positive lifestyle changes, naturopathic doctors are the foremost experts in evidence-based natural medicine.^[19]

Naturopathic medicine is also at the forefront of treating chronic diseases including heart disease, cancer, and diabetes as well as non-opioid pain management. When you become a naturopathic doctor, you will be joining a respected and financially rewarding profession helping to solve significant medical challenges and improve the lives of your patients.^[20]

PRINCIPLES OF NATUROPATHIC MEDICINE

HEALING COMES FROM WITHIN.

Naturopathic medicine views each patient as an integrated being, honoring a patient’s inherent healing potential, identifying underlying causes, treating the whole person, beginning with least invasive therapies, and working in partnership with patients to make life-sustaining changes.

FIRST DO NO HARM

This principle is core to naturopathic practice, where we approach care through utilizing the most natural, least invasive or toxic therapies.

THE HEALING POWER OF NATURE

Naturopathic providers recognize the body’s inherent healing wisdom and work to harness that healing power to guide patients to wellness and total health.

IDENTIFY AND TREAT THE CAUSES

This principle guides naturopathic physicians to not only address the reported symptoms, but to uncover the root cause and heal the body as an integrated whole.

DOCTOR AS TEACHER

Through an education and trust-based relationship, naturopathic providers seek to not only heal patients, but educate them by elevating patient health literacy and ensure patients are empowered with a better understanding of their wellness.

TREAT THE WHOLE PERSON

Naturopathic physicians understand how interconnected the body is, acknowledging that the restoration of balance and health comes through treating the body as a whole.

PREVENTION

Comprehensive naturopathic care employs all principles to identify potential areas of imbalance to prevent illness.

STEPS OF NATUROPATHIC THERAPEUTIC ORDER

WE FOLLOW THESE STEPS.

The Therapeutic Order guides the practice of naturopathic medicine. Followed in order, naturopathic physicians seek the root cause and move to methods that invoke the body's natural healing powers, determining how supplementary naturopathic techniques may aid the body before addressing any physical alignments to restore structural integrity to the body. If patients find that they're unable to find relief through natural symptom relief methods, only then do naturopathic physicians employ synthetic symptom relief tactics or high-force interventions.

1

ESTABLISH THE CONDITIONS FOR HEALTH

Ultimately, naturopathic physicians aim to bring patients back to health, so physicians start with removing any obstacles to health by creating a plan with the patient to address these obstacles. Oftentimes these obstacles include diet, excessive stress, destructive coping mechanisms, inadequate rest, and more. Removing obstacles to cure is core to the expression of the Naturopathic Philosophical Principle: Treat the Cause.

2

STIMULATE THE *VIS MEDICATRIX NATURAE* AND SELF-HEALING PROCESSES

Naturopathic physicians believe in the body's innate ability to heal itself and stimulate a patient's healing nature through therapies like acupuncture, homeopathy, botanical medicine, nutrition, and more.

3

SUPPORT AND BALANCE PHYSIOLOGIC AND BIOENERGETIC SYSTEMS

Sometimes body functions need more than stimulation to improve, this is when naturopathic physicians employ their vast knowledge to aid in restoring optimal function to an entire physiologic or organ system. Modalities employed can include professional grade supplements, endocrine balancing, manual therapies, and more.

4

ADDRESS OR CORRECT STRUCTURAL INTEGRITY

If patients require the use of physical therapies, naturopathic physicians call on treatments like massage therapy, spinal manipulation, cranio-sacral therapy, and more to improve and maintain skeletal integrity.

5

ADDRESS PATHOLOGY USING SPECIFIC NATURAL SUBSTANCES OR INTERVENTIONS

While naturopathic physicians aim to restore health by addressing the body as a whole and not just symptoms, there are instances where specific pathologies must be addressed and managed. In cases like these, naturopathic physicians utilize effective natural substances that are unlikely to cause toxic burden and can effectively relieve symptoms that cause suffering.

6

ADDRESS PATHOLOGY USING PHARMACEUTICAL OR SYNTHETIC SUBSTANCES

Naturopathic physicians aim to avoid this step, but if necessary, they may employ the use of synthetic or pharmaceutical substances to restrain or manage symptoms that impact a patient's quality of life or safety.

7

SUPPRESS OF SURGICALLY REMOVE PATHOLOGY

Sometimes it is necessary for the interest of patient health, comfort, and safety to suppress pathological symptoms prior to addressing underlying causal factors and ultimately restoring health.

Finnell JS, Snider P, Myers SP, Zeff J. A Hierarchy of Healing: Origins of the Therapeutic Order and Implications for Research. Integr Med (Encinitas). 2019 Jun;18(3):54-59. PMID: 32549816; PMCID: PMC7217399.

CURRICULUM HIGHLIGHTS

KNOWLEDGE IS POWER.

- ▶ Clinical courses start on the first day and continue throughout the curriculum.
- ▶ Integration of content by body systems.
- ▶ Case-based instruction and testing in preparation for Objective Structural Clinical Examination (OSCE) and Naturopathic Physician Licensing Examination (NPLEX) Parts I & II.
- ▶ Field observation shadowing community physicians in the first 2 years of study.
- ▶ Elective offsite program shadowing physicians in the fourth year of study.
- ▶ Standardized patient program.
- ▶ Dedicated focus on your future career as a naturopathic doctor.
- ▶ Exclusive honors tracks provide focused clinical experiences and are available for select students who apply. Tracks have included: community health, pediatrics, regenerative medicine, botanical medicine, and nature cure.
- ▶ Concurrent enrollment allows students to take advantage of multiple degree programs to maximize their time at Sonoran University and graduate with two healthcare degrees.

CONCURRENT DEGREES

EARN TWO DEGREES SIMULTANEOUSLY.

Sonoran University offers a pathway to allow students to earn two degrees at once. While working toward a Doctorate of Naturopathic Medicine degree from Sonoran University, you can also earn a:

- ▶ **Master of Clinical Nutrition (MSCN)**
from Sonoran University of Health Sciences
- ▶ **Master of Applied Clinical Nutrition (MSACN)**
from Sonoran University of Health Sciences
- ▶ **Master of Nutrition Business Leadership (MSNBL)**
from Sonoran University of Health Sciences
- ▶ **Master of Science in Acupuncture (LAc)**
from Phoenix Institute of Herbal Medicine & Acupuncture
- ▶ **Master of Science in Public Health**
from the University of Arizona’s Mel & Enid Zuckerman College of Public Health

HONORS TRACKS^[21]

DIVE HEADFIRST INTO YOUR PASSION.

Focus in: Community Health • Nature Cure • Botanical Medicine • Pediatrics • Regenerative Medicine

Designed for students who want a focus, Sonoran University’s community health, nature cure, pediatrics, botanical and regenerative medicine honors tracks are designed for students who are looking to have an emphasis on a particular area of naturopathic medicine.

Each track is exclusive and centered around the student’s professional and educational development. Students are given preferential scheduling for student clinical rotations, a more hands-on clinical focus and mentorship from doctors.

When it comes to postgraduate preparation, these focused areas of clinical education can help elevate students’ CVs and portfolios. They also help position students for competitive postgraduate opportunities and residencies.

Each honors track is granted through application only. Applications are due at the end of the third week of Quarter 11 and begin in Quarter 12 of the program.

PROGRAM OUTCOMES

LEARN A THING OR TWO HUNDRED.

Equipped with a broad understanding of both evidence-based science and naturopathic principles, you'll transition from a student to a practicing naturopathic physician, researcher, nutraceutical engineer, public health professional, or educator. Regardless of your path, you are entering a dynamic and growing profession.^[22]

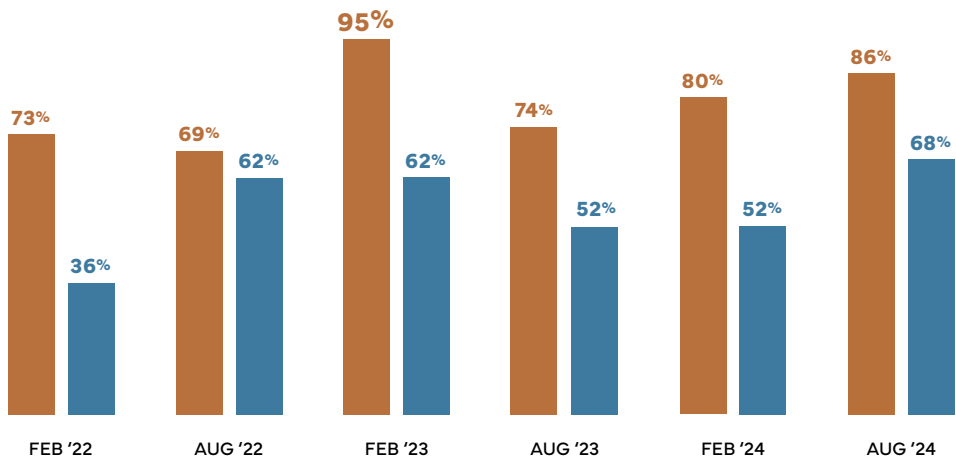

If you choose to stay in Arizona after graduation, the state offers one of the largest scopes of practice for licensed naturopathic physicians. This gives naturopathic doctors prescriptive authority, the ability to administer IV-therapy, as well as practice acupuncture.^[23]

Furthermore, our graduates are well-prepared for professional success, as evidenced by the performance of our first-time test takers on the NPLEX. They have consistently outperformed the combined all-schools average, demonstrating the strength of our academic program and commitment to excellence.

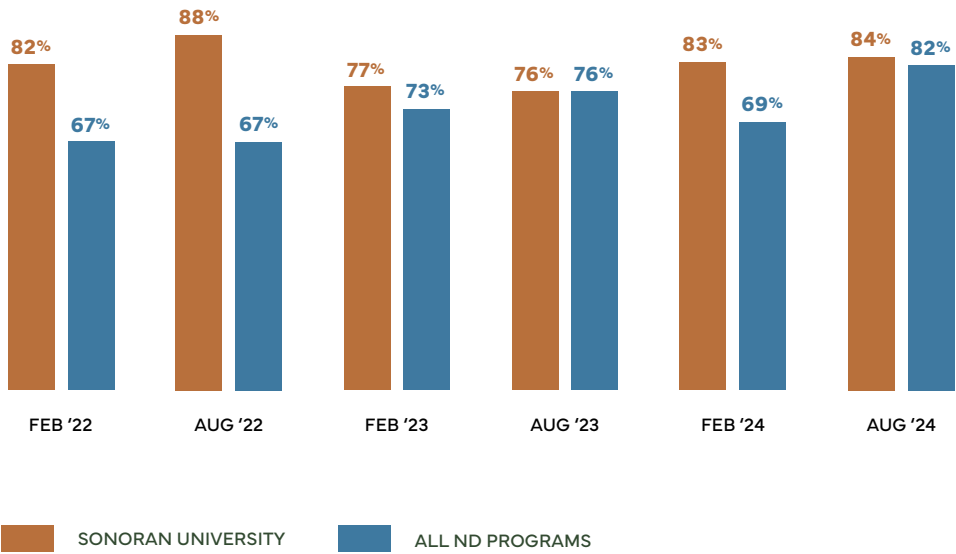

► **ABOUT NPLEX**

The purpose of Naturopathic Physician Licensing Examination (NPLEX) is to provide excellent examinations that are reliable and offer a valid assessment of a candidate's readiness to be a safe practitioner. NPLEX follows the testing standards set forth in the Standards for Educational and Psychological Testing (compiled by the American Educational Research Association, the American Psychological Association, and the National Council on Measurement in Education).

NPLEX I FIRST-TIME PASS-RATES

WORLD-CLASS CLINICS.

SONORAN UNIVERSITY NEIL RIORDAN CENTER FOR REGENERATIVE MEDICINE

For two generations the name Riordan has been synonymous with medical advances harnessing the body’s innate healing ability.^[24] Neil Riordan Center for Regenerative Medicine is building on this legacy, turning the tide from symptom suppression to regeneration and healing. Opened in late 2018, the Neil Riordan Center for Regenerative Medicine is located in a 6,200-square-foot space on the ground floor of the Sonoran University Lim Commons building.^[25] Through patient care, research, and medical education, the Neil Riordan Center for Regenerative Medicine is helping to usher in a new era of non-opioid approaches to treating pain and chronic disease^[26]

Patient Care Features:

- ▶ 10 examination rooms
- ▶ 2 open treatment bays
- ▶ 2 counseling rooms
- ▶ Newly expanded surgical suite
- ▶ C-arm fluoroscope
- ▶ Ultrasound-guided injection therapies

SONORAN UNIVERSITY MEDICAL CENTER

The Sonoran University Medical Center creates a clinical environment unique to any naturopathic clinical setting.^[27] Hydrotherapy, a core modality in naturopathic medicine and an important component of European water spas, comprises nearly thirty percent of the Center and includes a custom-designed steam area, two saunas (far infrared/radiant), and a hydrotherapy/color therapy suite. There are also two minor surgery suites with high-definition video equipment for recording or transmitting certain procedures, with patient consent, for learning purposes. Intravenous therapies, which can be a prominent treatment method for many health conditions, are provided in the IV Suite.

Patient Care Features:

- ▶ 27 examination rooms
- ▶ Minor surgery suite
- ▶ IV therapy suite
- ▶ Hydrotherapy suite
- ▶ Telemedicine

LABORATORY

Our laboratory is a COLA-accredited, moderate-complexity laboratory with experienced, certified laboratory personnel.^[28] We offer diagnostic laboratory testing in a personal and caring environment.

MEDICINARY

Sonoran University’s Medicinary offers an expansive collection of the highest quality, professional-grade supplements, herbs and health products.^[29] Located on campus in Tempe, we are a convenient and reliable resource for patients visiting the Sonoran University Medical Center and Sonoran University Neil Riordan Center for Regenerative Medicine, as well as the general public.

A clinical student on rotation at the Roosevelt Health Center.

Primary healthcare for displaced individuals transitioning from homelessness to secure housing
- **TEMPE ELEMENTARY CLINIC***

Primary healthcare for students & families from the Tempe School District

**Funded by Sage Foundation for Health*

COMMUNITY CLINICS

MAKING A DIFFERENCE IN OUR COMMUNITY.

The Sonoran University Sage Foundation for Health provides funding to community clinics throughout Maricopa County which are staffed with licensed faculty physicians and third- and fourth-year medical students from Sonoran University’s College of Naturopathic Medicine.^[30] Patients include children in underserved and under-resourced school districts, survivors of domestic violence, women and children experiencing homelessness and recovering from trauma, LGBTQIA2S+ health, individuals coping with HIV/AIDS and patients recovering from drug and alcohol use.^[31]

Student physicians treat chronic and acute health conditions by working with patients to restore health and improve self-care choices through daily diet, exercise, and stress reduction treatment plans.^[32] These shifts give students a unique opportunity to provide treatment and gain skills and experience in a community healthcare setting, as well as enhance their cultural and patient-first competencies through working with a variety of patient populations. Treatments often include clinical nutrition, botanical medicine, physical medicine, acupuncture, homeopathy, and prescription medicines when necessary. Thanks to generous community support, services and treatments are provided to patients at no cost.^[33]

Clinical rotation training at Sonoran University is designed to provide an intuitive progression of medical education. Our demanding program exceeds the clinical education requirements as prescribed by the Council of Naturopathic Medical Education (CNME).^[34] Sonoran University offers a variety of clinical experiences, and our students treat patients using cutting-edge techniques like injection therapies for pain relief at the Neil Riordan Center for Regenerative Medicine.

READY TO APPLY?

REQUIREMENTS FOR APPLYING

- ▶ To apply to Sonoran University’s Doctor of Naturopathic Medicine program, prospective students must complete a baccalaureate degree from an accredited or candidate college or university as well as have completed the required prerequisite coursework with a minimum GPA of 3.0.
- ▶ We encourage applicants to send unofficial transcripts for a free prerequisite evaluation and academic advising session. Email your unofficial transcripts to **admissions@sonoran.edu** and include your full name, mailing address, and phone number.

APPLICATION PROCESS DETAILS

- ▶ Applicants are considered based on academic performance, occupational history, professional potential, maturity, concern for others, and emotional maturity.
- ▶ Sonoran University accepts applications on a rolling basis for both Spring and Fall cohorts.
- ▶ Application requirements, deadlines, and a link to Sonoran University’s application are available at **sonoran.edu/admissions/requirements** or by calling **888-882-7266**
- ▶ Applications may be submitted online via the Doctor of Naturopathic Medicine Centralized Application Service at **ndcas.liaisoncas.com** or to Sonoran University Admissions directly: **sonoran.edu/admissions/apply**
- ▶ Tuition, books, and living expenses may be covered by federal financial aid for those who apply and qualify. Approximately 90% of Sonoran University students receive financial aid in the form of Federal Stafford loans. For more information on applying for financial aid, contact the Sonoran University Financial Aid Office toll-free at **888-882-7266** or email **finaid@sonoran.edu**

ACCREDITATION

Sonoran University of Health Sciences is accredited by the Higher Learning Commission. Sonoran University's ND program is accredited by the Council on Naturopathic Medical Education (CNME), a professional accrediting agency for naturopathic medical programs. Both accreditors are recognized by the U.S. Department of Education.
